

Nigel Reed – ON-Water Director 2018

I have been around boats all his life, mainly fishing boats

I took up sailing at the request of my wife in order to get me to "do something"

I immediately fell in love with sailing and became a member of Lakeshore yacht club.

It was at that club I purchased my first sailboat a 25ft C&C. I was very involved in the winter storage program and maintenance of sailboats.

After a year I joined Bronte Harbour Yacht Club and became a part of the racing group and crewed on "It's a conspiracy" as foredeck crew.

I also took Weather and Diesel engine repair programs with the Power Squadron. In addition, I was involved in the sailors nights where seminars were presented on navigation, engine repairs, electrical repairs for boats and boat construction repairs.

In addition to being very active as a volunteer in launch and haul out, I also served as duty officer as required. I have participated in both GHYRA and Peaches and Perfs.

It was during these regattas that I became aware of Newport Yacht club, I liked it so much I joined Newport Yacht Club, moved my boat here then decided to move here with my wife Sue.

As "On -Water Director" I wish to enable all boaters to enjoy the water in a safe manner as well as building relationships with other yacht clubs. I realize I cannot do this alone. So I am looking for an "On water committee" that would help. If you are interested please contact Nigel.
