

Wes Cox

I have been a resident of the Newport Community since 2005 as well as a boating member of the club. I am a Certified Millwright from Local 1916 in Hamilton since 2000 and most recently managing a small construction & engineering firm that specializes in steel mill maintenance and construction. I have been on the great lakes my entire life, including a small term sailing the great lakes on a freighter while in college attending the Great Lakes International Maritime Training and Research Center in Owen Sound.
