

PERSON OVERBOARD EMERGENCY PLAN

1. Be aware of distress calls from anyone falling overboard.
2. Know the location and procedure for life ring use. Life rings are located around the perimeter of the club off the boardwalks.
3. Employees are required to wear life vests when working over the side of any structure or floats. Members should also wear life jackets when working alone in precarious positions on their boat.
4. In all overboard cases involving cold water or prolonged exposure, assume victim has hypothermia (heat loss from body) and handle gently and keep from losing further body heat. Medical treatment is advised. 911 should be called immediately.
5. In drowning cases, assume that the victim is severely hypothermic and alive. After removing the victim from the water, immediately begin CPR first aid, and continue until Rescue or Medical personnel arrive and take over. Remember, no one should be given up as dead because they look and feel dead.

Emergency Contacts:

- Commodore – Zena Thomas – 289-253-7731
- Property Manager – Mark Thomas – 905-971-9246
- Membership – Jeff Hansford – 905-719-3800
